

WHAT'S INVOLVED IN ROOF RESTORATION?

Step 1: Installation Of Safety Equipment

Where necessary, temporary edge protection or safety harnesses are used to ensure work can be done safely

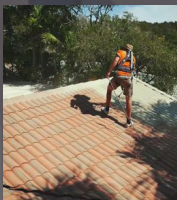

Step 2: Roof Cleaning

Next we clean the roof using high pressure water blasters. This removes any built up dirt and moss

Step 3: Roof Repairs

Any necessary roof repairs like ridge cap repointing are carried out to make sure the roof is ready for cleaning and painting

Step 4: Primer & Sealer

A coat of primer/sealer is now applied to the roof to allow time for it to soak into the porous tile. For metal roofs we apply Metal Primer Plus

Step 5: Roof Protect Membrane

Two thick coats of Roof Protect roof membrane are applied in a colour of your choice

Step 6: Clear Glaze Coating

Lastly, our patented Nano Glaze coating is applied to protect the roof and extend the product warranty to a massive 15 years

INDUSTRY LEADING PRODUCT WARRANTY.

We offer the longest product warranty in Australia. Utilising our patented 4 coat system, we can offer an unprecedented warranty on our Roof Protect roof restoration system. Here's what the four coat system includes:

- 1 x coat of Roof Protect High Build Primer / Sealer
- 2 x coats of Roof Protect Roofing Membrane
- 1 x coat of Nano Protect Clear Glaze

This amazing 15 year product warranty is only available when you use one of our accredited applicators.
